Color Enhancer
Assistive technologies

SIHO STEUNPUNT INCLUSIEF HOGER ONDERWIJS

1. Description?

☐ **Color Enhancer** is a customizable color filter that can be applied to web pages to improve color perception. This allows users to better perceive colors on web pages.

2. For whom and why?

☐ Color Enhancer is interesting for students with **(partial) color blindness**. It is possible to develop a color filter to optimally perceive colors on web pages for you personally. Via the filter you can adjust the properties of the colors, such as saturation and brightness.

3. How does it work?

☐ **Settings**| Via the icon with three colored dots next to the address bar, click on "enable" and "setup". Select the row of stars with the most fainted stars. Move the slider that appears until all stars are clearly visible and click OK to confirm the settings.

4. Pricing

☐ The use of Color Enhancer is **free of charge**.

5. Language

☐ Color Enhancer is available in English.

6. Type and platform

☐ Color Enhancer is a **web extension**, available for computers and laptops via Google Chrome.

7. More information?

☐ Install the Color Enhancer web extension here.
